Dana Belgium - (CNC) Machine operator

In search of (CNC) Machine operator

- You work in our machine department (CNC turning/milling/toothing) or in the grinding line (CNC grinding/hard turning).
- Depending on your department, you operate a number of machine tools, including lathes, milling machines, drill presses and grinders.
- You regularly inspect the cutting tools and parts during production.
- You are responsible for the quality of the parts you deliver and take the necessary measurements after production to guarantee this.
- After training, you are able to set and adjust machine tools in line with changes in production.

What do we expect from you?

- You have technical or higher secondary vocational training (A2/A3), preferably in the areas of mechanics, electromechanics, machine tools and design techniques.
- You are responsible, accurate and quality-conscious.

What do we offer you?

- An open-ended contract, subject to experience/proper training, or an eight-month contract with the possibility of a (permanent) extension.
- A job in a two-shift system or fixed night shift.
- An attractive salary, supplemented with fringe benefits (meal vouchers, group insurance, hospitalisation insurance).
- A good work-life balance linked to an advantageous leave arrangement.
- Training and development opportunities.
